# Safe Scape Field

A separate field for every sport? That would be ideal, of course. However, since many clubs, schools and municipalities are limited in budget and available space, it's not always possible.

The solution? Multifunctional pitches, suitable for different sports. Multifunctional pitches make it possible to play many different sports on the same surface. Schools, smaller clubs and municipalities, in particular, make use of these pitches because expenditure can be reduced to just one sports field.

GCC Sport Surfaces has an appropriate sports surface for every situation and for every substrate. There are no limits with GCC Sport Surfaces, even when it comes to unusual applications and specialist issues requiring integrated, tailor-made solutions.

You can choose from a wide range of sport floor types, both permeable and impermeable. The intended use of the sport floor will determine its construction.

For example, GCC Sport Surfaces has undertaken commissions from a number of contractors and architects to lay multifunctional sports fields on various types of roofs on top of sports halls, schools and buildings, both in the Netherlands and abroad.

GCC Sport Surfaces offers a range of materials, finishes and surface layers.

To find out more about the possibilities of Safe Scape Field, please contact us. We will be happy to speak to you.
